AUTHOR INDEX

VOLUME 51

Altendorf, Karlheinz, 477
Arrow, Amy S., 439

Bagg, Anne, 509
Banerjee, Amiya K., 66
Barrett, Ericka L., 192
Berry, D. F., 43
Bollag, J.-M., 43
Butt, Tauseef R., 351

Clark, Marta A., 192
Cockley, Karen D., 431
Colwell, R. R., 365

Davis, Bernard D., 341
Dimroth, Peter, 320
Driessen, Arnold J. M., 498
Drlica, Karl, 301

Ecker, David J., 351

Francis, A. J., 43

Guidolin, Angelo, 285

Häder, Donat-P., 1
Hausinger, Robert P., 22
Holmes, Randall K., 206

Janssens, Pim M. W., 396
Johnston, Mark, 458
Jones, William J., 135

Konings, Wil N., 498

Lyon, Bruce R., 88

Manning, Paul A., 285
Masure, H. Robert, 60
Miller, Paul F., 439
Mirelman, David, 272
Mueller, John P., 439

Nagle, David P., Jr., 135
Neilands, J. B., 509
Nevins, Joseph R., 419
Novick, Richard P., 381

O'Brien, Alison D., 206

Poolman, Bert, 498

Rapp, Fred, 431
Roszak, D. B., 365
Rouviere-Yaniv, Josette, 301

Schneider, Erwin, 477
Shattuck, Rebecca L., 60
Skurray, Ron, 88
Storm, Daniel R., 60

Taber, Harry W., 439

Van Haastert, Peter J. M., 396

Whitaker-Dowling, Patricia, 179
Whitman, William B., 135
Woese, Carl R., 221

Youngner, Julius S., 179

SUBJECT INDEX
VOLUME 51

Adenosine 5'-triphosphate synthase
  F_0 complexes, 477
Adenovirus gene expression, 419
Adenylate cyclases
  pathogenicity, 60
Amebiasis
  ameba-bacterium relationship, 272
Aminoglycoside antibiotics
  mechanism of action, 341
  uptake, 439
Antimicrobial resistance
  S. aureus, 88
Archaebacteria
  methanogens and diversity, 135
Aromatic compounds
  metabolism, 43

Bacterial evolution, 221
Bacteriophages
  V. cholerae, 285
Biotechnology
  yeast metallothionein, 351

Calmodulin-sensitive adenylate cyclases
  pathogenicity, 60
Complementation
  replication by unrelated viruses, 431

Dictyostelium discoideum
  transmembrane signal transduction, 396

GAL genes
  S. cerevisiae, 458

Histonelike proteins, 301
Hydrogen sulfide production, 192

Iron assimilation
  siderophore mediated, 509

Metallothionein
  biotechnology, 351
  yeasts, 351
Methanogens
  diversity of archaebacteria, 135

Nickel utilization, 22

Pathogenicity
  calmodulin-sensitive adenylate cyclases, 60
Photosensory behavior, 1
Plasmid incompatibility, 381

Replication
  complementation, 431
  viruses, 431
Rhabdovirus transcription and replication, 66

Saccharomyces cerevisiae
  GAL genes, 458

Shiga toxin, 206
Shiga-like toxins, 206
Siderophore-mediated iron transport, 509
Sodium ion cycling, 320
Sodium ion transport decarboxylases, 320
Solute transport
  streptococci, 498
Staphylococcus aureus
  antimicrobial resistance, 88
Streptococci
  solute transport, 498
Survival strategies
  natural environment, 365

Tetrathionate reduction, 192
Thiosulfate
  hydrogen sulfide production, 192
  tetrathionate reduction, 192
Transmembrane signal
  D. discoideum, 396

Vibrio cholerae
  genetics, 285
  phages, 285
Virus
  complementation for replication, 431
  dominance of mutants over the wild type, 179

Yeasts
  metallothionein
    biotechnology, 351
